

Drawing Your Project Boundary for a TreeBaltimore Planting Request

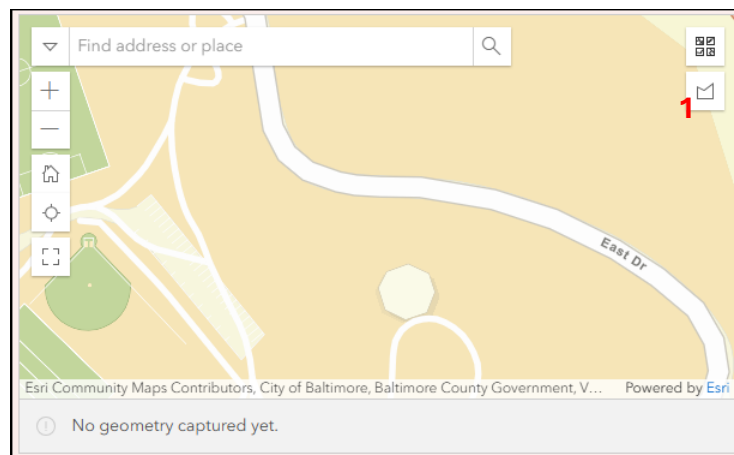

From a web browser:

Locate your project area on the map.

This can be done a few ways:

- The address search bar on the top
- Zoom in/out using the +/- buttons, click and drag to move the map around.
- CTRL + scroll to zoom in, click and drag to move the map around.

When you've located your area on the map, select the 'Area' button in the top right corner (1):

Click on the map to create points along the boundary of your project.

To finish, double click.

If you would like to adjust your area, there will be a pencil icon (2) that you can select to edit the area.

If you would like to start over, select the trash can icon (3) to delete.

From a mobile device

Press on the map to open it.

Locate your project area on the map by the address search bar on the top; or pinch and drag to move the map around.

Select the draw button (1), bottom right, and tap on the map to drop points along the boundary of your project.

Double tap to finish.

If you would like to adjust your area, there will be a pencil icon (2) that you can select to edit the area.

If you would like to start over, select the trash can icon (3) to delete.
